- Payment Gateway API's (Stripe, Authorize.net, PayPal) and other third party API integrations.

PROFESSIONAL EXPERIENCE

VIIIONTECH Lahore

Senior PHP/Laravel Developer

IT TOWER, GULBERG III Lahore, PUNJAB, PAKISTAN

November, 2025 – April, 2026

- Worked on the development of Vertex-HCM Management System at Viiontech, a complete HRM solution designed to manage and automate company workforce operations. Contributed to multiple modules including Payroll Processing, Employee Management, Custom Reports, Attendance, and Employee On-boarding & Off-boarding workflows. Focused on backend functionality, database handling, and improving system efficiency to support business requirements and smooth HR operations.
- Collaborated closely with the Laravel Team Lead and React Frontend Developers to build and integrate secure REST APIs for the system. Main responsibility was developing scalable backend APIs using Laravel, implementing business logic, handling database operations, and ensuring seamless communication between frontend and backend services. Also worked on debugging issues, optimizing performance, and enhancing existing features to improve overall system stability and user experience.

ATOZ CODERSOFTWARESOLUTIONS

TEAM LEAD

GULFISHAN COLONY, FAISALABAD, PUNJAB, PAKISTAN

DECEMBER, 2024 – September, 2025

- Developed a custom **Inventory & Stock** Management System for Provix Therapeutics, featuring batch tracking, real-time stock updates, supplier management, and detailed reporting dashboards.
- Built a custom Quiz Management System for Heartbeat Perfusion Solutions, developed quiz grading and student management with Tailwind CSS, integrated presentation uploads in CRM, and enhanced security by sanitizing inputs, encrypting sessions/cookies, and improving the company's custom MVC framework.
- Built a custom CRM solution for OMEGA Sales GmbH, engineered efficient import/processing of about more than 17.5M+ records from Excel sheets in Core PHP, integrated VPP Lekker API for fetching and filtering electricity/gas offers (by city, postal code, and consumption units), enabled digital contract signing with downloadable PDFs, and optimized big-data handling with validation, caching, and performance tuning.

ATOZ CODERSOFTWARESOLUTIONS

Senior Software Developer

July 2023 - September, 2025

- Developed a custom Call Center HRM for Aydan Group, implemented employee management, address/street/meter number imports, and advanced lead management with multi-status tracking (Sale, Re-schedule, Canceled, Interested, etc.). Built a multi-step live lead form with session recovery for internet interruptions, and designed a KPI dashboard with sales/lead analytics.
- Developed a custom CRM web application for Heartbeat Perfusion Solutions, applied Core OOP principles to optimize page performance during form submissions, implemented dynamic data retrieval with parameterized queries (no direct queries on pages), and built custom-designed divs with skeleton loaders for a smooth, modern UI/UX.
- Built an HRM web application for Omega Sales GmbH, converted Figma designs to modern HTML UI/UX, optimized the system to handle 15K+ record imports via query tuning at first, indexing, loaders, and chunked data display. Implemented street and household unit management, advanced filtering, KPI dashboards with data indicators, report generation, and household appointment scheduling.
- Developed a CRM web application for KDM Auto Spa, created a responsive ordering system with three service packages (Basic, Monthly, Pro), integrated CarsAPI for vehicle details, and enabled payments via cash, Authorize.net API's, and Zelle. Built an admin panel for order management, added holiday scheduling, coupon-based discounts, tip options, and automated status updates through email using (PHPMailer) and SMS (Twilio API).

ATOZ CODERSOFTWARESOLUTIONS

Junior Software Developer

January 2022 – February, 2024

- Developed a custom Class Tracking System for DiSLEKSi DESTEK EĞİTİM MERKEZİ, built four role-based portals (admin, teacher, manager, secretary), created a custom rota/calendar using PHP date functions for student scheduling, and implemented graphical reporting with bar charts to track classes by lesson, student, or teacher. Supported multiple lesson types (academic, attentioner, group, evaluation) and added teacher salary history management.
- Built a loan eligibility checker for Easyloan UAE, developed a multi-step, zero-page-reload form with custom live validation to determine user eligibility. Implemented automated email notifications to generate leads for the company when a form is submitted.

ADDITIONAL INFORMATION

- Strong ability to break systems apart for weaknesses and build them back stronger—hands-on with debugging, optimizing code.
- Proven track record of designing unique software solutions (RFID inventory systems, quiz apps, real-time user tracking) and finding creative shortcuts to complex challenges.
- Jira, GitHub, Wappalyzer, Linux/Ubuntu system administration.
